BOH Rule for Post-exposure Management of Dogs and Cats Recommended by the NC Division of Public Health

On December 20, 2016, by the authority granted in Article 2, 130A-39 of the General Statutes of North Carolina, the Hyde County Board of Health will vote to adopt the rule for post-exposure management of dogs and cats recommended by the NC Division of Public Health. This model rule for rabies post-exposure management of dogs and cats implements and particularizes the authority given to the local health director in G.S. 130A-197 to effectively and efficiently protect the public's health utilizing the most current science. Accordingly, the Hyde County Board of Health will adopt the recommendations and guidelines for rabies post-exposure management of dogs and cats specified by the National Association of Public Health Veterinarians in the 2016 edition of the Compendium of Animal Rabies Prevention and Control (Part 1. B. 5. Post-exposure Management). These provisions of the Compendium shall be the required control measures pursuant to G.S. 130A-197.

In keeping with 130A-39(d), notice of this proposed rule adoption is being made available at the office of the clerk of court and published in the Washington Daily News and Coastland

Times, the two newspapers with general circulation within the area of the Board's jurisdiction.
Copies of the rule to be adopted are available at the Hyde County Health Department.

Hyde County Board of Health, Chair
